> College/university training projects in artificial intelligence

FICHE F08

SETUP OF PERMANENT SUMMER SCHOOL PROGRAM IN ARTIFICIAL INTELLIGENCE AND COGNITIVE SCIENCES

This project involves the setup of a permanent summer school in artificial intelligence focusing on the cognitive sciences and intended for postsecondary students. The object of the school would be to introduce college students and university undergraduates to artificial intelligence and the cognitive sciences, and to open the door to university-level training in the field. The first two years of operations would be devoted to targeting and consolidating program content and integrating notions of AI into college curricula.

Participating institutions: UQAM, Cégep André-Laurendeau

External partners: IVADO, Google AI, ISC-UQAM, CRIA-UQAM

Project leaders: Fatiha Sadat, professeure, département d'Informatique et membre de l'Institut des sciences cognitives, UQAM (sadat@fatiha@uqam.ca), Christian Thérieault, professeur, département de Mathématiques, Cégep André-Laurendeau (theriaultchristian@gmail.com).
